

# Corporate Banking

## Open Banking performance and availability quarterly report

1 October 2023 to 31 December 2023

# Contents

What's the purpose of this report?	3
Service availability	4
Service performance - account information	5
Service performance - payments	6
Service performance - confirmation of funds	7
Service performance - error rate	8
Daily performance and availability data	9

---

## What's the purpose of this report?

The purpose of this report is to show how our Open Banking channel is performing and, where applicable, compare performance to our direct digital channels – internet banking and the banking app – which, for the purposes of this report, we refer to collectively as our customer channels.

It highlights:

- the percentage of time each of our digital channels is available or 'up';
- the time it takes our digital channels to respond to requests for account information, to initiate payments or to process confirmation of funds checks; and
- the percentage of requests to our Open Banking APIs (Application Programming Interfaces) which fail due to an error with our systems.

Open Banking is based on APIs (Application Programming Interfaces), a technology which enables the secure exchange of information between banks and TPPs (Third Party Providers). More information can be found by visiting [business.hsbc.uk/open-banking](https://business.hsbc.uk/open-banking).

We publish this report each quarter and the next report, covering January 2024 to March 2024, will be published in April 2024.

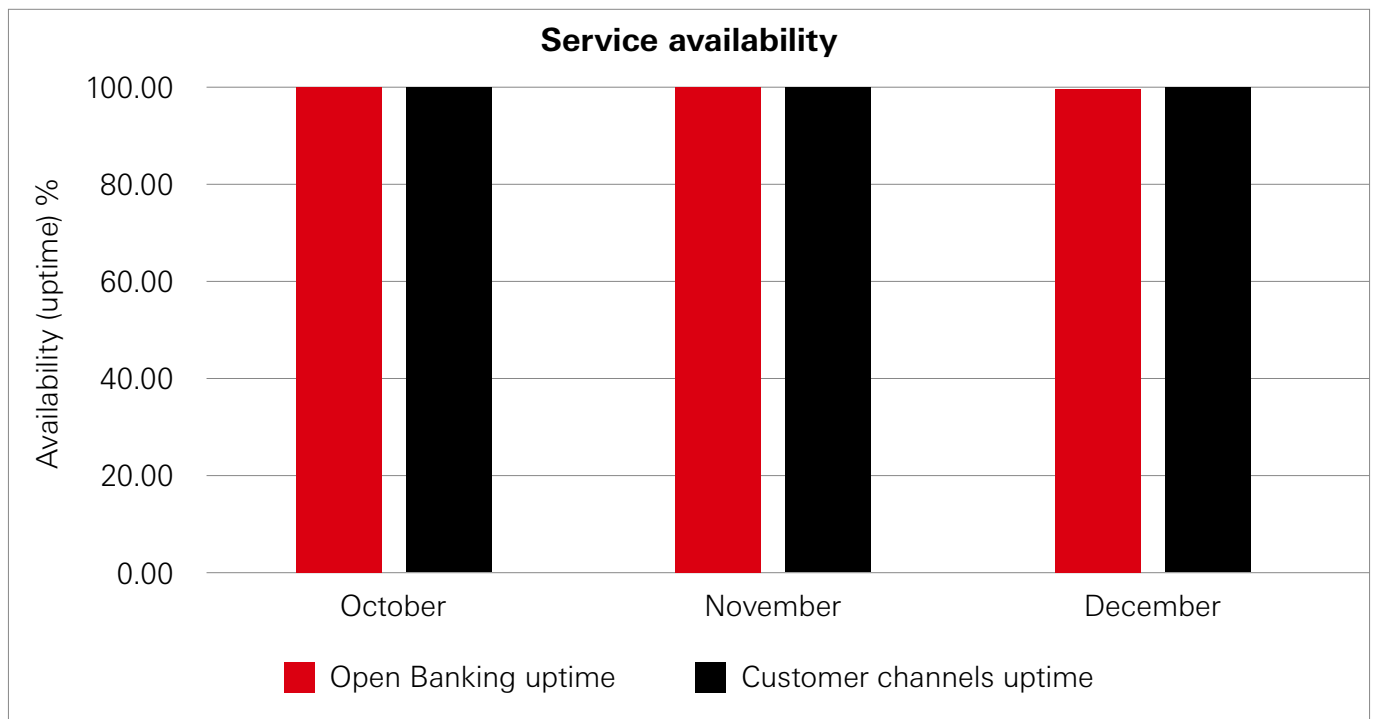

## Service availability

The chart and figures below show the daily average availability (or uptime) of each of our digital channels over the last three months.

Uptime is calculated as 100% minus percentage downtime.

Our Open Banking service is regarded as down if five consecutive TPP requests to any of our APIs fail within thirty seconds.

Our customer channels are regarded as down if users are unable to log into their account due to a system error and they can't view balances or transactions and can't initiate payments.

Month	Open Banking uptime (%)	Customer channels uptime (%)
October	100.00	100.00
November	100.00	100.00
December	99.93	100.00

## Service performance - account information

The chart and figures below show the daily average time taken in milliseconds (ms) by each of our digital channels to respond to requests for account information over the last three months.

Account information can include account balance, transaction history, payees and details of scheduled payments, standing orders and Direct Debits.

To allow a meaningful comparison with the Open Banking channel, our customer channels performance figures:

- include the time taken for our backend systems to respond to the customer interface; and
- exclude the time taken for that interface to present the response (e.g. account and transaction information) to the customer.

Month	Open Banking performance (ms)	Customer channels performance (ms)
<b>October</b>	1178	1700
<b>November</b>	833	1618
<b>December</b>	770	1666

## Service performance - payments

The chart and figures below show the daily average time taken in milliseconds (ms) by each of our digital channels to process requests to initiate payments over the last three months.

Payments can include single immediate payments or future dated payments.

To allow a meaningful comparison with the Open Banking channel, our customer channels performance figures:

- include the time taken for our backend systems to respond to the customer interface; and
- exclude the time taken for that interface to present the response (e.g. payment confirmation) to the customer.

Month	Open Banking performance (ms)	Customer channels performance (ms)
October	442	1242
November	473	1230
December	494	1250

## Service performance - confirmation of funds

The chart and figures below show the daily average time taken in milliseconds (ms) by our Open Banking channel to respond to confirmation of available funds requests from TPPs over the last three months.

Confirmation of funds is an Open Banking service which enables TPPs to check that sufficient funds are available before initiating a payment.

Month	Open Banking performance (ms)
October	257
November	268
December	425

### Service performance - error rate

The chart and figures below show the daily average performance of our Open Banking channel over the last three months in terms of the percentage of all requests from TPPs which failed, due to errors attributable to our systems.

Month	Open Banking error rate (%)
October	0.02
November	0.03
December	0.08

## Daily performance and availability data

The tables below contain the daily performance and availability data which was used to create the charts shown in this report.
