

Corporate Banking

Open Banking performance and availability quarterly report

1 October 2024 to 31 December 2024

Contents

What's the purpose of this report?	3
Service availability	4
Service performance - account information	5
Service performance - payments	6
Service performance - confirmation of funds	7
Service performance - error rate	8
Daily performance and availability data	9

What's the purpose of this report?

The purpose of this report is to show how our Open Banking channel is performing and, where applicable, compare performance to our direct digital channels – internet banking and the banking app – which, for the purposes of this report, we refer to collectively as our customer channels.

It highlights:

- The percentage of time each of our digital channels is available or 'up';
- The time it takes our digital channels to respond to requests for account information, to initiate payments or to process confirmation of funds checks; and
- The percentage of requests to our Open Banking APIs (Application Programming Interfaces) which fail due to an error with our systems.

Open Banking is based on APIs (Application Programming Interfaces), a technology which enables the secure exchange of information between banks and TPPs (Third Party Providers). More information can be found by visiting business.hsbc.uk/open-banking.

We publish this report each quarter and the next report, covering January 2025 to March 2025, will be published in April 2025.

Service availability

The chart and figures below show the daily average availability (or uptime) of each of our digital channels over the last three months.

Uptime is calculated as 100% minus percentage downtime.

Our Open Banking service is regarded as down if five consecutive TPP requests to any of our APIs fail within thirty seconds.

Our customer channels are regarded as down if users are unable to log into their account due to a system error and they can't view balances or transactions and can't initiate payments.

Month	Open Banking uptime (%)	Customer channels uptime (%)
October	100.00	99.66
November	100.00	100.00
December	99.98	100.00

Service performance - account information

The chart and figures below show the daily average time taken in milliseconds (ms) by our digital channels to respond to requests for account information over the last three months.

Account information can include account balance, transaction history, payees and details of scheduled payments, standing orders and Direct Debits.

To allow a meaningful comparison with the Open Banking channel, our customer channels performance figures:

- Include the time taken for our backend systems to respond to the customer interface; and
- Exclude the time taken for that interface to present the response (e.g. account and transaction information) to the customer.

Month	Open Banking performance (ms)	Customer channels performance (ms)
October	717	1032
November	698	977
December	475	953

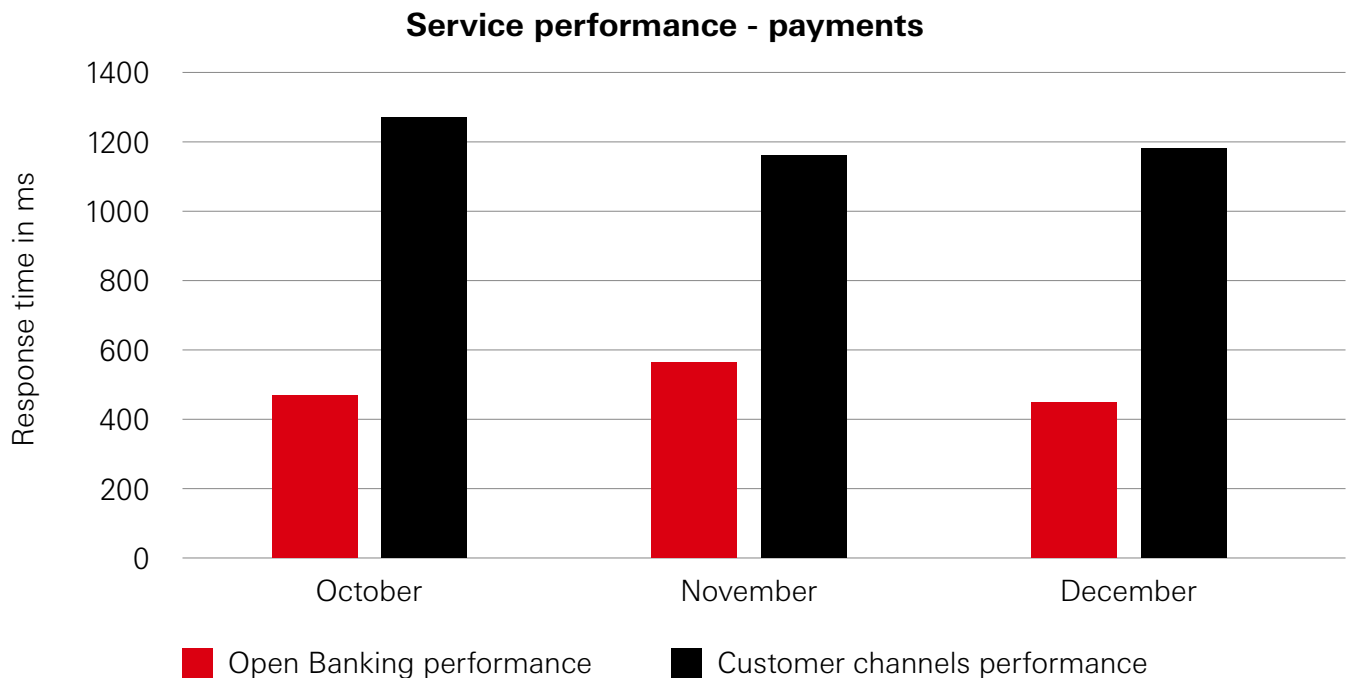

Service performance - payments

The chart and figures below show the daily average time taken in milliseconds (ms) by our digital channels to process requests to initiate payments over the last three months.

Payments can include single immediate payments or future dated payments.

To allow a meaningful comparison with the Open Banking channel, our customer channels performance figures:

- Include the time taken for our backend systems to respond to the customer interface; and
- Exclude the time taken for that interface to present the response (e.g. payment confirmation) to the customer.

Month	Open Banking performance (ms)	Customer channels performance (ms)
October	462	1269
November	572	1184
December	454	1195

Service performance - confirmation of funds

The chart and figures below show the daily average time taken in milliseconds (ms) by our Open Banking channel to respond to confirmation of available funds requests from TPPs over the last three months.

Confirmation of funds is an Open Banking service which enables TPPs to check that sufficient funds are available before initiating a payment.

Month	Open Banking performance (ms)
October	346
November	352
December	321

Service performance - error rate

The chart and figures below show the daily average performance of our Open Banking channel over the last three months in terms of the percentage of all requests from TPPs which failed, due to errors attributable to our systems.

Month	Open Banking error rate (%)
October	0.03
November	0.03
December	0.06

Daily performance and availability data

The tables below contain the daily performance and availability data which was used to create the charts shown in this report.
